

Dow Chemical Positions Opalis Automation As Pragmatic Starting Point in Cloud Journey

Opalis and Dow Chemical co-Present IT Automation Benefits at Gartner IOM Summit

Orlando Florida – June 24, 2009 – Opalis Software Inc., the market leader in IT process automation software with some of the largest customers in the world, today announced that Charles Crouchman, Opalis CTO and Seneca Louck, Dow Chemical's Enterprise Systems Management Architect will be presenting at the Gartner IT Infrastructure, Operations & Management Summit 2009. More information on the session can be found on the [Gartner Data Center Conference website](#).

The presentation will cover how Opalis provides the automation fabric necessary to provide dynamic cloud resources through integration and orchestration of virtual services and management tools. Dow Chemical will explain how they reduced their IT workload by 30% through automating incident response, while planning ahead to build a cloud enabled infrastructure. The presentation will also cover how Opalis IT Process Automation helps:

Plan An Enterprise Ready Cloud Strategy:

- Leverage existing investments in vendors & technology
- Reduce existing IT operations costs through automation & integration
- Standardize existing key operations on processes not vendors and tools
- Create new physical, virtual and cloud computing lifecycle processes
- Automate & integrate processes between the enterprise and cloud computing

[Gartner Session # 937](#) is a must-see for those delivering outsourcing, and large enterprises that manage their own IT operations or outsource their IT.

Gaylord Palms Resort & Conference Center, [Osceola Ballroom A](#)

Thursday, 25 June 2009 9:15 AM to 9:45 AM

Sign onto the [Gartner Agenda Builder Page](#) and pick session # **SPS11**

Additionally, Opalis will be demonstrating the latest version of their award winning automation platform, Opalis Integration Server 6.2 at booth C on the show floor. The latest release showcases new RBA 2.0 features and the latest solution for Cloud Lifecycle Management.
